A New Beginning

The New Beginnings Schools Foundation (NBSF) network of charter schools is a seamless Pre-K through 12th grade learning community.

Come Grow With Us

The New Beginnings Schools Foundation wants to grow with you. Newsletters, meeting opportunities, Facebook, Twitter and the NBSF website are tools to increase parent and community participation.

21st Century Learning Community

NBSF is excited to announce the opening of our new, state-of-the-art learning facility. The Avery Alexander site, opening August 2017, will serve as the new home for Gentilly Terrace Charter School and Pierre A. Capdau Charter School.

The 21st-century learning center will feature art and music rooms, outdoor recreational spaces, a media center, an expansive cafeteria, a gymnasium and a science lab to encourage hands-on learning and accommodate the more than 750 Pre-K through 8th grade students enrolled.

Academic Excellence

Student achievement is our highest priority at New Beginnings. Thanks to the high-quality instruction of our faculty and staff, the dedication of our scholars and our parent involvement, the New Beginnings Schools Foundation tracked improvement in nearly every grade level and subject on the 2016 LEAP.

Every Child, Every Day

New Beginnings Schools Foundation provides a safe, inclusive environment that promotes partnerships with parents, students, faculty and the community to produce life-long learners who are critical thinkers. Our commitment is to expose students to data-driven instruction that is engaging and will provide meaningful lessons to innovatively prepare students for success in life, college and careers.
